

SYNOPSIS

Salzburg - City of White Gold

Salzland Salzburg

Salzburg has salt to thank for its grandeur and for its wealth. This "white gold" with which god has blessed these mountains was so valuable it was used as currency during the Middle Ages. Although it was just as essential an ingredient as it is today, it also had another function: to preserve food in the absence of refrigeration. Given that it was crucial for the preservation of provisions, journeys at sea would have been unimaginable without it. This ORFIII program looks back at salt production and explains its archiepiscopal aspects from this perspective.

Year: 2017

Run-Time: 1 x 45 min.

Directed by Gernot Stadler

A co-production by ORFIII and Pre-TV

Available worldwide

Languages: German (ORIGINAL)
