

SYNOPSIS

Stars on Street

Stars on Street

«Stars on Street» is a cultural experiment with hidden cameras. What happens when internationally renowned artists take themselves out of their usual context of the concert hall or the opera house, and present themselves to the public without the usual trappings? The multimedia «Stars on Street» project supplies entertaining answers to this question and follows Aleksey Igudesman, Ildikó Raimondi, Martin Grubinger, Natalia Ushakova and Herbert Lippert as they attempt to make a go of being street artists.

Year: 2017
