

SYNOPSIS

Opening up Iran - A Chance for Business and Human Rights

Iran Öffnung - Chance für Wirtschaft und Menschenrechte

For a decade Iran has been excluded from international trade because of its nuclear policies. With the ending of sanctions in mid-January, the Islamic theocracy has again stepped onto the international trade stage. Will this economic expansion also lead to socio-political change? Systematic human rights violations, arbitrary arrests and hundreds of executions still take place every year.

Year: 2016
