

SYNOPSIS

Intersex - Neither Woman nor Man?

Intersex - Weder Frau noch Mann?

When a child comes into the world the first question to be asked is usually «is it a boy or a girl?» But what if neither really applies, if the baby is born without definite sexual characteristics? Every year in Austria around 25 children are born that cannot be unambiguously classified as either boys or girls. These children are termed intersex. And since, in our society, there is only male or female, many intersex children are still made into «real» boys or girls through sex-assignment surgery. This is an approach that often has traumatic consequences for those concerned. «Intersex - neither woman nor man?» follows Tobias and Alex as they fight for recognition of what has until now been an almost completely ignored reality.

Year: 2017
