

SYNOPSIS

In the Land of the Rising Sun

Im Land des Sonnenaufgangs

In spring, the animal and plant world suddenly awakes within a few golden days. In early summer, rare wild flowers dot the meadows, and some of them are found only here. Highly adapted bird species populate the bullrushes, and salty ponds and puddles are lined with plant life from the sea coast. Slowly approaching winter brings a breath-taking spectacle: More than 15 000 wild geese stop over on their way south. Evening after evening large flocks come gliding in to spend the night on the waters edge.

Year: 1997

Run-Time: 1 x 50 min.
