

SYNOPSIS

Wonderland of Ice

Wunderwelt aus Eis

They are considered to be the largest ice caves in the world and attract thousands of visitors every year who want to see the unique ice formations with their own eyes: the Eisriesenwelt in the Austrian Alps. This documentary pays a visit to one of the most impressive natural treasures on earth and presents a portrait of the people for whom the ice has become an integral part of life. Historical pictures show the discovery of the ice caves and their development from being the goal of expeditions to being a place for day trips through the construction of the, at that time, steepest cable car system in Europe. Unique stories, that make the ice sparkle, give an astounding insight into this unique natural spectacle of stone and ice. Or would you have believed that the Eisriesenwelt once served as the training arena for ice skaters? In this wonderland of ice everything seems possible.

Year: 2007

Run-Time: 1 x 28 min.

Directed by Viola Pöschl
