

# SYNOPSIS

## Lofty Heights - Vienna from Above

### Luftige Höhen - Wien von oben

Vienna from the perspective of those whose workplaces hit lofty heights. From chimney sweeps, roofers, construction workers and crane drivers, the stonemasons working to maintain the top of the tower of St. Stephen's Cathedral, the building service engineer on the Ringturm tower, via the man who hoists the flag on the roof of Parliament, the window cleaners who take care of the views from Vienna's skyscrapers, to the high points of Viennese tourism: the Danube tower, the Flak tower containing the public aquarium and the postal service satellite dishes, offices and apartments in Vienna's high rise buildings. A very entertaining story with people who talk about their views on, and above all from their points of view about Vienna from above.

**Year:** 2013
