

# SYNOPSIS

## 14th May 1948: Israel

### Israel - 70 Jahre ein fast normales Land

This year Israel celebrates its 70th anniversary: the Jewish state was founded with the support of the UNO in May 1948, three years after the end of the Second World War and the Holocaust with its six million Jewish victims. The Palestinians who fled or were driven out of the territory view this day as a catastrophe that was followed by war and occupation. Today, Israel stands as much for high tech and start ups as it does for a daily existence under the constant threat of terror and war, as much for open, liberal people as for ultra orthodox Jews and extreme right wing Jewish settlers.
