

SYNOPSIS

Rediscovering Freedom - The Puch 500

Puch 500- Die Wiederentdeckung der Freiheit

No other car conjures up the spirit of Europe in the 1950's as strongly as the Puch 500, lovingly known as the «elephant's roller skate» or the «snog-ball». What 50 years ago was a symbol of economic advancement is today an expression of personality, or a kind of substitute metal dog. With the aid of archival footage and the reminiscences of former drivers and Puch collectors the film evokes a compelling sense of nostalgia.
