

SYNOPSIS

Europe's Last Nomads

Europas letzte Nomaden

A spectacular ancient tradition is being revived right across Europe: herdsmen leading flocks across the continent through the most savage and extreme landscapes. From Spain's legendary La Manchaplains, the last cowboys of this continent and their cattle migrate into the green highlands of Cuenca. In Romania sheep climb the Carpathian Mountains, all the way to the Ukrainian border, constantly under threat from wolves. On a Welsh island, migrating sheep even generate a habitat for rare birds.
