

SYNOPSIS

Mexico's Animal Migrants

Wildes Mexiko

Mexico is one of earth's few mega-biodiverse regions. Aside from residents like jaguars, eagles, roadrunners and tarantulas, there are also migrants that come in their millions from all across North and South America. Some animal adventurers set out from Mexico, others return to it or travel through. Snow Geese, Gray Whales, Free-Tailed Bats, Monarch Butterflies, Whale Sharks, Rufous Hummingbirds and the River of Raptors: together their stories create a living map of all of Mexico, with its most iconic animals and most spectacular landscapes.
