

SYNOPSIS

3D Mega Shark

This is a detective story. Take one monstrous shark, ancestor of present day Great White, and various controversial theories about whether or not it is in fact extinct. Add a group of highly skilled profilers who pool their knowledge on build up a picture of «carcharodon megalodon», the most terrifying predator which has ever lived and you have Mega-Shark. In a truly unique approach, the concept of the FBI criminal profiler is juxtaposed and interwoven with all the elements which make up a quality natural history film about sharks.
