

SYNOPSIS

Lighting Design

Licht-Gestalten

From discos to art galleries, from nightclubs to home cinemas - projectors have broken free of the cinema and are now to be found everywhere. They have even inspired a new art form: «projectionism». This documentary presents the life and work of three so called visualists, video jockeys or VJs - artists who create moving picture compositions on their computers and project them in synch with musical rhythms at live events. It's no coincidence that Vienna has established itself as a trendsetter in the VJ world. In the baroque age, Vienna has already been the birthplace of a type of «projectionism» using frescoes - a mass media art form with emotionally charged content.
