## My Alexandria

### Mein Alexandria

Even in ancient times, the Egyptian seaport on the south eastern Mediterranean was shrouded in legend. 100 years ago, Alexandria was home to the royal stock exchange for cotton, a raw material that was traded as oil is today. This meant the city was a magnet for large numbers of migrants from Italy and Greece, who made their fortune there and gave the city its European flair. Today Alexandria is a shadow of its former self - and yet its former grandeur continues to shimmer on every corner.
