

SYNOPSIS

My Brussels

Mein Brüssel

Hardly no other European metropole fights with such a bad image like the capital city of Belgium, which is also the capital city of the European Union - Brussels. Since the 1950s it is a synonym that stands for a historic political project to unite a continent, that exists of enemies over centuries. Political visionaries meet political brakemen, visionaries meet modifier, progress meets standstill. Socially, cultural and especially in the architectural way worlds collide. The lack of concept and order take the Brussels mostly patiently towards in order to preserve their own individualism and also at the same time this typical variety: Not everything is running smoothly, but it works - almost like in the European Union, for which Brussels is the ideal location for EU capital offers. Brussels leaves no clear verdict about to - and thus no prejudice.

Year: 2013
