

SYNOPSIS

When the Water Rises - Escape from the Great Flood

Wenn der Meeresspiegel steigt - Rettung vor der großen Flut

The year 2100: Millions of people are forced from their homes in Mumbai, Tokyo, Guangzhou, and Bangladesh. The United States are not spared either: Miami, New Orleans and New York have been evacuated. Large parts of the cities are under water. Today 700 million people living in coastal areas are affected by the rising sea levels. Climate change is now irreversible, the polar caps are melting, sea levels are rising relentlessly. Island states such as the Maldives have disappeared under water. Will the sea itself be our future habitat?

Year: 2019

Run-Time: 1 x 52 min.

Directed by Matthias Widter

A co-production by ORF/3sat and RaumFilm in association with ORF-Enterprise
