

SYNOPSIS

Green Gold - Styrian Pumpkin Seed Oil

Das grüne Gold - Kürbiskernöl aus der Steiermark

Besides its vineyards, crystal clear green lakes, old castles, historic summer residences and monasteries, it also produces culinary attractions. Specifically Styrian wines, sweet chestnuts and pumpkin seed breads make up the distinguished flavor of the region, but one product stands out: The Styrian Pumpkin Seed Oil. Production is complex and sophisticated, a long road has to be travelled before a bottle of Original Styrian PumpkinSeed Oil can hit the shelf. Many small farms still produce the «Green Gold» applying old traditions with a lot of handcraft. It is a task that requires utmost diligence.

Year: 2006
