## Yugo 45 - The Worst Car in the World

### Yugo 45 - Das schlechteste Auto der Welt

One rarely finds an object with as much significance as the Yugo 45. This small car embodies, in its way, the whole history of a country now confined to the history books - the country that was once known as Yugoslavia. Introduced in 1980 it was the first locally produced car in Josip Broz Tito's great empire. A quarter of a century later, the Yugo is still rolling along and even made it into famous Hollywood action films. Although parts may occasionally be missing and the motor is prone to overheating, the car remains a symbol of Yugoslavian national pride.
