

SYNOPSIS

Where Crystal and Marvel Merge

Heimat des Staunens - Die neuen Kristallwelten in Wattens

In his documentary, Kurt Mayer embarks on a journey through these worlds: to the 3D-animated Planet of Crystal, to the Crystal Dome that leads into the inner sanctuary of the crystal, and to the Crystal scope, the world's largest kaleidoscope. Using its own particular aesthetic approach, this film investigates our fascination with crystals, while at the same time, Kurt Mayer gives us an insight into the suggestive possibilities of themed attractions that offer new and unique experiences, allowing even adults to forget themselves, not unlike little children at play.

Year: 2003

Run-Time: 1 x 30 min.
