

# SYNOPSIS

## Life for the Queen

### Leben für die Königin

Any beekeeper can produce honey, candles, mead and ointments. That's why master beekeeper Peter Unterberger decided to specialise in breeding queen bees. It's a difficult undertaking that requires lots of patience and intuition. This documentary follows the internationally renowned beekeeper over several months as he produces his niche product. Additionally the busy expert beekeeper, whose family has kept bees for generations, holds numerous courses at his idyllic «bee farm», in which he passes on his unparalleled knowledge. Without any ifs and buts, it's a bee-autiful life!

**Year:** 2009
