

SYNOPSIS

Pioneers of Heliskiing, Snowboarding & Freestyle Skiing

Heliskiing, Snowboarding & Freestyle: Wie alles begann

New developments in skiing equipment and various new trends breathe new life into this fascinating sport. Heliskiing is more popular than ever, but hardly anyone knows who started it. Back in the 1960s Austrian immigrants Hans Gmoser and Mike Wiegele were busy inventing helicopter skiing in the Canadian Rockies. This lucrative business has added an interesting new dimension and image to the ski industry. Together Gmoser and Wiegele have brought alpine skiing back to its Austrian roots. Skiers can enjoy untamed nature and the spirit of freedom. A spectacular documentary on a very special way of skiing.

Year: 2010

Run-Time: 1 x 30 min.
