

SYNOPSIS

New Life Blooms in the Desert

Neues Leben in der Wüste

In the course of the Sphinx project he encountered the desert for the first time. His invention has also helped to make the desert green and suitable for growing crops. Several projects are now in the works, including one in Senegal, one of the countries south of the Sahel zone hardest hit by the drought. The local population now plants and cultivates crops it has never seen before.

Year: 2002
