

SYNOPSIS

Tailor Made Drugs - Dream or Reality?

Medikamente des 3. Jahrtausends

According to John Kuriyan, world renowned researcher in the field of molecular medicine and Chancellor's Professor at the University of California, Berkeley: »It's not a revolution, it's many revolutions, a completely new type of medicine - comparable to the development of Anatomy with the first human dissection - that's made possible by the new perspectives and possibilities found at the molecular level.«

Personal, individualized treatments, free of negative side effects are nearly a reality. This documentary examines how these treatments will be developed and shows the effects the revolution in molecular medicine has already had on the world.

Year: 2007

Run-Time: 1 x 43 min.

Directed by Bernhard Hain
