

SYNOPSIS

Hydrogen - Power of the Future

Der Stoff, aus dem die Zukunft ist - Energie aus Wasserstoff

What's up with the hydrogen myth? The film shows the future of energy production, transport and processing based on hydrogen as a source of energy. The centres of our energy industry in Central Europe, Iceland and the US are illustrated in sweeping pictures and accompanied by mystical music. The film is supported by detailed research and has a global approach. Fascinating 3-D simulation takes us into the world of electrical chemistry.

Year: 2002

Run-Time: 1 x 43 min.

Directed by Carl A. Fechner and Martin Pehnt

focus-film Produktion for NDR

Available worldwide except for Germany, Denmark, Sweden, Norway, Finland and Iceland

Languages: German (ORIGINAL)

Format: 16:9 , 16:9
