

# SYNOPSIS

## Weather Lab Alps

### Wetterküche Alpen

Is it true that our winters are becoming shorter and shorter? Is the number of catastrophes caused by weather phenomena in the alpine area really growing? Has the eternal ice of the glaciers been tagged with an expiry date? Will low-lying ski areas endure winters without snow? How does climate change affect alpine vegetation? Flying their hot air balloon, which was equipped by the Sonnblick weather station, Meteorologist Andreas Jäger and his camera crew are taking a comprehensive look into the consequences of climate change.
