

SYNOPSIS

Future Markets - Hightech for the world of tomorrow

Zukunftsmärkte - Hightech für die Welt von Morgen

A new propulsion system for an affordable eco-car, the skeleton for a humanoid robot or extremely fast lasers for eye surgery. When resourceful minds innovate and experiment, exciting products are the result. Be it entrepreneurs, investors or scientists - the passion for technology inspires the spirit of research and hones the feel for new areas of business. An inspiring and interesting documentary about new technologies and their practical applications.

Year: 2013
