

SYNOPSIS

Healing Beyond Mainstream

Heilen jenseits der Schulmedizin

Modern medicine has achieved much. But many chronic diseases and cancer stretch it to its limits. More and more people consult therapists, doctors, and healers who achieve great and seemingly inexplicable success with their often unconventional methods. Over the last decade, brain, nervous system, and immune system research has yielded many new insights into how and why mental techniques and other complementary therapies can be successful. Meditation, hypnosis, relaxation exercises, massage techniques, and other chiropractic therapies have long since passed the test of serious studies and -- if performed by reputable therapists -- are among the important complementary therapies, which can spell success particularly with chronic suffering. Healing beyond Mainstream Medicine introduces the various mechanisms that are helpful for a cure.

Year: 2014

Run-Time: 1 x 52 min.
