

SYNOPSIS

Intelligence is Genderless - Women in Technical Research

Der Verstand hat kein Geschlecht - Frauen in technischer Forschung

More and more women are forcing their way into the male dominated domain of technical research and proving that they have what it takes to make a successful career in this area. In fact they often tackle tasks with more enthusiasm and motivation than their male colleagues. Women have achieved outstanding results, for example, in research into nanotechnology, nuclear physics and biotechnology. However, far too few women continue to choose a career in a technical field, even though after graduating they can quickly find themselves, not just with a job, but in a senior position. A film about the «battle of the sexes» in science.

Year: 2007

Run-Time: 1 x 43 min.
