

SYNOPSIS

The Near-Death Phenomenon - Is There Life After Death?

Phänomen Nahtod - Gibt es ein Leben nach dem Tod?

How should one speak about something for which there are no words? In general, those who have been narrowly "brought back to life" report leaving their physical body, being bathed in heavenly light, experiencing cosmic harmony and meeting the dead when they speak of their experiences. Quite apart from speculation about the veracity or the cultural determinacy of such reports, it is certain that near-death experiences are more than momentous for those concerned, and in many cases can lead to positive changes in the way they live their lives and deal with death. The film gives a voice to those who are able to report from their own acute experiences.
