

SYNOPSIS

The INNside Story

Inn - Der grüne Fluss aus den Alpen

A cascade of water pouring from glaciers and a lake in the high mountains, a waterfall tumbling from high up into the valley, a chain of lakes at the base of 10,000-foot peaks, drawn-out gravel banks, mud flats and extensive riparian forests at the river's lower reaches: the Inn has many facets to show, and a fascinating tale to tell. It's the longest tributary of the Danube in Central Europe, flowing through Switzerland, Austria and Bavaria along its 520-kilometer course. The variety of landscapes is reflected in the diversity of the flora and fauna along the river: grayling and trout swarm in its headwaters, dragonflies, frogs and rare water plants populate the oxbows; owls and bats raise their young in the bluffs. It is the river's indestructible power, however, which is most impressive: in spite of many hydropower plants and dams lining its path, the river still carries more than a million tons of gravel and silt downstream every month, before emptying its load into the Danube.

Awards: WorldMedia Festival 2012: WorldMedia Festival Award, New York Film Festival Television, Programming and Promotion 2013: New York Film Festival Television, Programming and Promotion Award, New York Film Festival Television, Programming and Promotion 2013: New York Film Festival Television, Programming and Promotion Award, Ménigoute, International Ornithological Film Festival 2012: Ménigoute, International Ornithological Film Festival Award, Goethe Institut Science Film Festival 2012: Goethe Science Film Festival Prize

Year: 2011

Run-Time: 1 x 50 min.

Directed by Franz Hafner

A co-production by ORF, Interspot Film, bm:ukk, BR, SF in association with Vienna Film Fund, Austrian Television Fund, Cine Tirol, Landesregierung Tirol and Landesregierung Oberösterreich

Available worldwide except for Germany and Switzerland

Languages: German (ORIGINAL) , English (DUBBED) , French (DUBBED)

Format: 16:9
