Drakensberg - Africa's Dragon Mountains

Im Bann der Drachenberge

A dragon hatched from the volcanic furnaces of Gondwanaland. Ancient almost beyond comprehension, yet a living thing. And vast, stretching across a subcontinent, its spine arching above the clouds...

No lucky dragon, this. Starvation festers beneath the shimmering green of its skin. But to the creatures that live along its flanks, it can be a bountiful provider as well as a remorseless destroyer. Today we call it the Drakensberg, or «Dragon Mountain». «Drakensberg» is a dynamic documentary journey through the life of this ever-astonishing mountain. It is also a story of animal survival in a landscape of overwhelming, pitiless power.
