

SYNOPSIS

The Big Picture

Der große Horizont

Life on Earth captured through satellite technology - a unique picture from space that offers an extraordinary and different view of our planet. Our space detectives create precise satellite pictures and spot potential problems. Floods and fires can be tracked daily and movements of ocean currents and snow-cover can be followed throughout the seasons. «The Big Picture» opens the skies, to let us peek as an outsider into a palette of discoveries on Earth.
