

SYNOPSIS

The Iron Forest

Wilder Wald im Land des Eisens

The Limestone Alps National Park is a mosaic of forests of different ages. The wild, romantic waterways are important habitats for many water insects and a paradise for the water ouzel and the gray wagtail. Another rarity shown in this film is a brood of black storks that do not actually nest in the national park but frequently catch trout in the park's brooks and streams.

Awards: U.S. International Film and Video Festival 1999: U.S. International Film and Video Festival Awards

Year: 1998
